€3.4M
Managed revenue on the firm's largest client, owned end to end

5x
Account growth in twelve months, from ~€700K

6
Concurrent workstreams at peak in one account

15+
Delivery staff directed across eight disciplines

6+
Years in consulting and transformation

STRENGTHS

- Engagement leadership, end to end
- P&L ownership, pricing and margin
- Portfolio ownership across multiple engagements
- End-to-end digital transformation delivery
- Target operating model design
- Options appraisal and business cases
- Executive and board-level governance
- Deal structuring and negotiation
- Change management (Prosci ADKAR)
- Workshop design and facilitation
- AI-enabled delivery (n8n, HubSpot, Claude)

SECTORS

iGaming · Consumer and retail
Utilities · Pharmaceuticals
Telecoms · Public sector
Digital assets and payments

EDUCATION

Loughborough University
BSc Banking, Finance and Management
Loughborough Employability Award (scholarship)
A levels · A*BB

I lead client engagements end to end and carry the commercial result. At an enterprise technology firm I own the **P&L on the largest revenue-generating client**, running a portfolio of concurrent transformation and advisory workstreams, pricing the contracts from the cost base up, and directing the project managers, architects, analysts and engineers who deliver them. Previously Capgemini Invent and North Highland.

EXPERIENCE

NEOBRIDGE Senior Consultant — 2023 – present

- **Own the P&L on the firm's largest client account**, growing managed revenue from **~€700K to €3.4M in twelve months** (~5x) with €5M+ in further contracts in discussion. Built the 12–18 month account plan worked back from a target, qualified the pipeline against named economic buyers, and ran governance with the client's CTO and Chief Commercial Officer.
- **Run six concurrent workstreams** inside that account — two greenfield transformation programmes, a partnership negotiation, a scoping phase, an advisory engagement and a live support contract — each with its own scope, commercials and client counterpart, directing **15+ delivery staff** across project management, architecture, business analysis, engineering and QA through a programme manager and solution architect.
- **Originated and led a ~€2M affiliate growth marketing platform** after spotting a larger problem while delivering another engagement. Priced it on the client's payback (14–15 months of an 18-month term) to **lift the margin floor above the firm's 10–15% norm**; ran payout-model options, compliance and entity-structuring analysis and provider selection against nine weighted criteria. Live across three brands.
- **Led a ~€1M greenfield loyalty transformation** from a €40K diagnostic to live: designed the target operating model for shared loyalty across competing brands, then owned the build to baseline. Delivered **on time, in budget and to scope** to **10,000+ users across five brands**, with expansion terms pre-negotiated into the contract.
- **Originated and structured a revenue-share joint venture** with the same client, designing an eight-workshop decision process across both leadership teams: three structures scored on eight criteria, modelled with finance (base, upside, downside), staged economics and an executive decision memo. **Signed**, with walk-away rights and IP reversion.
- **Designed and implemented the company's commercial operating model** for the CEO across **nine functions**: ten decision workshops, a 13-stage pipeline with approval gates and forecast logic, 1,115 deals migrated, rolled out via conference-room pilot and Prosci ADKAR. **Conversion up ~15%**.
- **Took a board-tracked priority from no brief to a funded programme** as the CTO's proxy: a four-phase framework, 10–11 tool categories benchmarked against market leaders, the user community ranking the roadmap, and a business case approved by the board. **Double-digit growth** from a small base.
- **Rebuilt go-to-market for three stalled enterprise products** after testing and rejecting leadership's diagnosis: found three root causes, aligned the CPO, Head of Sales and product leads on one narrative, and delivered 15+ assets and a channel strategy. **Two new clients** and six-figure revenue — one of which became the largest account.

CAPGEMINI INVENT Consultant — 2022 – 2023

- Built the **end-to-end change strategy for a department-wide ServiceNow rollout** at the Government Digital Service (**1,000+ staff**), leading analysts on training, organisational and behavioural change (Prosci ADKAR).
- **Co-created the firm's first UK Web3 and NFT consulting offering** and built the investment case: the first UK team to win C-suite funding for its NFT strategy work. Delivered the first client engagement and originated a strategic partnership.
- **Business change lead on a national utility's multi-million-pound digital transformation**, managing a team across three concurrent workstreams on change strategy and operating model design.

NORTH HIGHLAND Analyst — 2021 – 2022

- Led client engagement on change, customer strategy and experience for a **multi-million-pound** pharmaceutical transformation, facilitating customer-journey workshops with **global clinical leads** that shaped a new clinical product.
- Drove adoption on a **multibillion-dollar** pharma transition through stakeholder analysis, engagement roadmaps and ambassador networks.
- Cleansed **10+ data entities** and built **three visualisation tools** for a multinational telecom's HR division covering succession, training and learning.
- Contributed to the firm's social mobility working group.
